## WORLD IMPACT

Since the COVID-19 outbreak was first diagnosed, it has spread to over 190 countries. The pandemic is having a noticeable impact on global economic growth. Estimates so far indicate the virus could trim global economic growth by as much as 2.0% per month if current conditions persist. Global trade could also fall by 13% to 32%, depending on the depth and extent of the global economic downturn. The full impact will not be known until the effects of the pandemic peak. This report provides an overview of the global economic costs to date and the response by governments and international institutions to address these effects
